

# Smart Home Technology

# Your Home with Nice Smart Home Automation

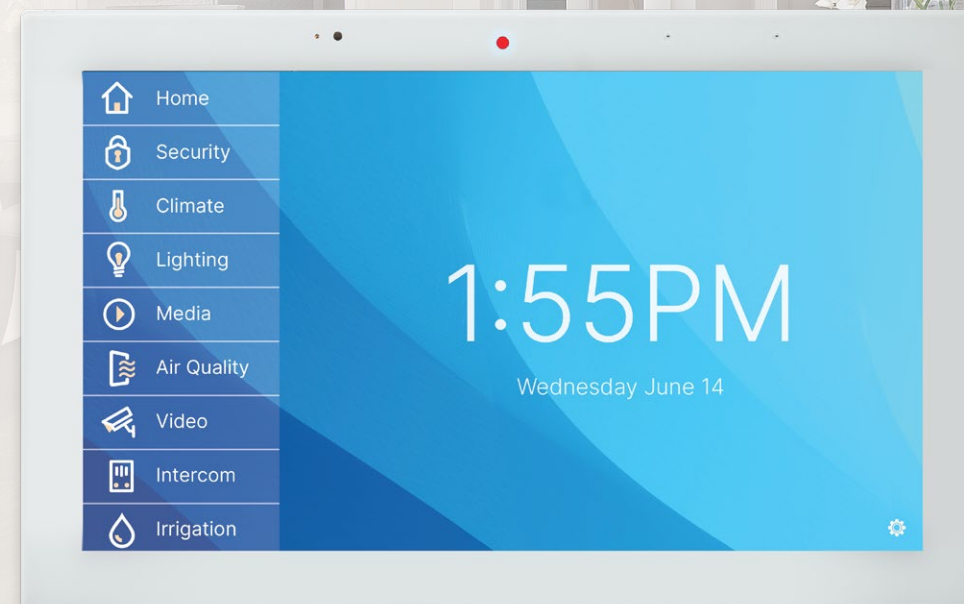

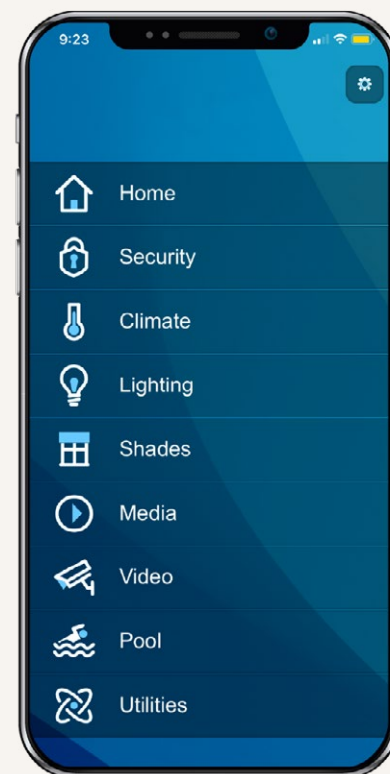

Welcome to the true meaning of smart home. Your security, lighting, climate, shades, surveillance, entertainment, and more can be smart, integrated, and accessible from anywhere in the world with one simple to use app. Discover the convenience and security of a connected smart home from Nice.

Let us take care of installing the necessary requirements for a connected smart home, so you can simply attach the personalized elements that best fit your lifestyle.

**With your Nice system, you receive endless control possibilities:**

- Entertainment
- Security
- Surveillance
- Lighting
- Climate
- Sunshades
- Indoor Air Quality
- Power Management
- And More!

**Nice**foryou

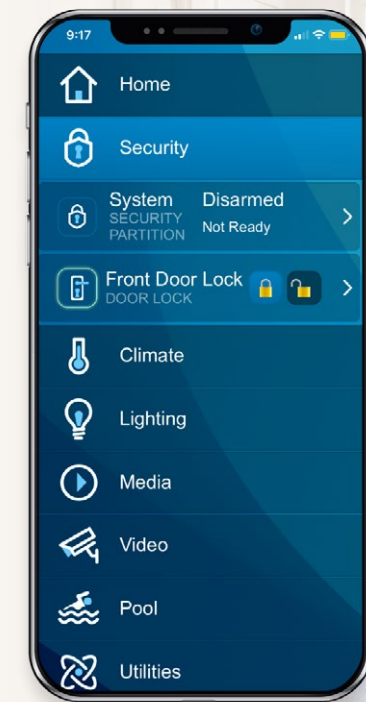

## Entertainment

Change the way you watch TV with one-touch control and immersive audio in your main media space. Your smart home remote extends control to lighting, climate, surveillance and more.

## Security

Keep your home secure with a complete security solution. Check status on every door/window contact, detect motion while away and enable smart smoke alarm listening. Receive personal alerts and be notified of any security events taking place all from your smartphone.

## Whole-home Audio

Play your favorite streaming stations across independently controlled stereo zones anywhere in your home. Hear the door chime through the speakers, even initiate an intercom page from your smartphone while home or away.

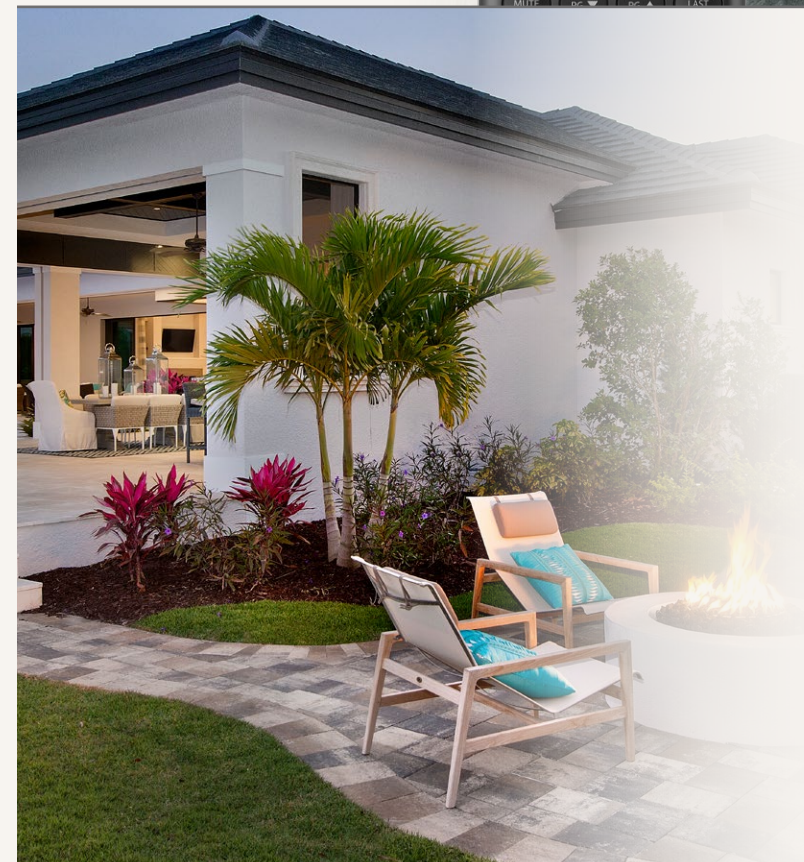

## Surveillance

Keep an eye on what matters most. Login to watch live streaming video, watch recorded clips, and receive alerts. Simply select a camera and tap on the NVR button to see live or recorded video footage – directly from your smartphone, touch panel, remote, or TV.

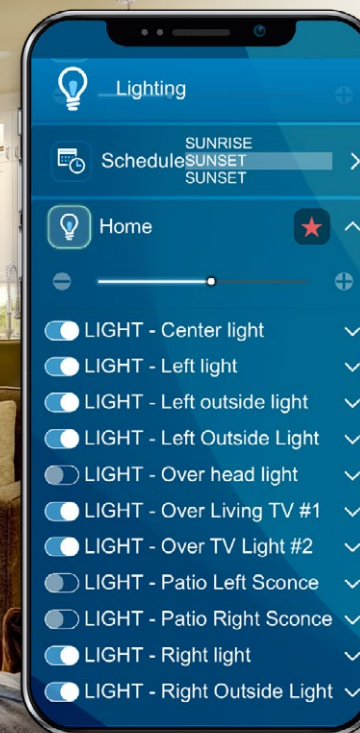

## Indoor Air Quality

Breathe easy. This system continuously monitors indoor air quality and checks for air pollution. When needed, your system will automatically turn on the nearest exhaust fan to eliminate pollutants and bring in fresh air from outside, keeping your home healthy and safe.

## Outdoor Audio

Bring indoor audio enjoyment outdoors with landscape audio. Featuring weatherproof landscape speakers that blend seamlessly into any outdoor environment. This landscape sound system is sure to bring brilliant audio performance to your new home's outdoor space.

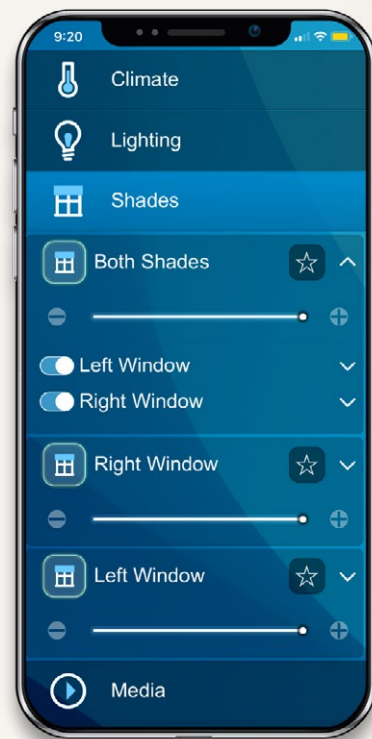

## Lighting

Tired of leaving the lights on or arriving back to a dark home? Integrated smart lighting allows you to conveniently control lighting scenes throughout your home – while home or away. Create scenes/schedules and save on energy by automating your home's lighting by event, time of day, season or specific action.

## Sunshade Solutions

Improve energy efficiency and protect against the sun elegantly with a completely custom fabricated shade solution. Adjust natural light according to personal tastes and needs with automated scenes/schedules based on time of day, season of year or specific events and actions. This solution is seamlessly integrated with your system for full control from your smartphone.

## WiFi Network

Reliable high speed WiFi through your home. No more dead spots, slot spots, drop-offs or buffering. Easily add mobile devices, tablets and TVs to your new home's network. Give your guests controlled internet access and manage parental controls.

## Endless Possibilities

These technology options are just a starting point. Your smart home can be tailored to your needs and grow with you and your family over time. Ask Nice how to add enhancements, such as home theater, voice control, touch panels, additional lighting, audio, and power management/battery backup.
